Purushottam Pattanashetty

Software Engineer | Java | REST APIs | MySQL | Backend Developer | .NET Developer | Angular | Learning in Public
Bengaluru, Karnataka, India

Summary

Software Engineer with 2+ years of experience building backend systems and enterprise web applications. Currently working with .NET 8 Web API and Angular 19, developing enterprise-grade solutions in an Agile environment. I specialise in:- Backend API development (.NET 8, Java, Spring Boot)- Database design and optimisation (SQL Server, MySQL, MongoDB)- Frontend integration (Angular 19, TypeScript)- REST API design with proper versioning and error handling. Recent work includes:→ Built an automated PDF certificate generation system eliminating 90% of manual processing for 500+ records→ Currently building AgriConsult — a farmer consultation platform using .NET 8 + Angular 19 (GitHub: [your link])→ Microsoft Azure Certified (AZ-900)→ MCA graduate — CGPA 8.7 from KLE Technological University. Previously worked at Click To Search, DLithe, Curilux, and Cognizant Technology Solutions. Actively seeking Software Engineer / Backend Developer roles in Bengaluru (open to remote). Open to: .NET, Java, Full-Stack, Backend roles.

Experience

DLithe

Software Engineer

February 2025 - Present (1 year 4 months)

Bengaluru

Technologies: Java, Spring Boot, MySQL, REST APIs

Designed and developed backend modules using Spring Boot and MySQL.

Created and tested REST APIs using Postman, improving data flow reliability.

Improved database structures and optimized SQL queries for performance.

Collaborated with team members during Agile sprints to deliver features.

Wrote clean, modular, and maintainable code using best practices.

KLE Technological University - Hubballi (India)

Assistant Professor

August 2024 - November 2024 (4 months)

Hubli, Karnataka, India

As an Assistant Professor, I focused on delivering industry-oriented computer science education, mentoring students in full-stack development, and bridging academic concepts with real-world applications.

Key Responsibilities:

Taught core subjects like C++, Web Technologies, and DBMS.

Guided students in building MERN Stack and Java-based projects aligned with current industry trends.

Conducted hands-on workshops on web frameworks, RESTful APIs, and cloud deployment (AWS).

Mentored students on coding practices, version control (Git), and project development workflows.

Contributed to curriculum enhancement and skill-based training modules.

Curilux (Jeevini)

Back End Developer

June 2023 - August 2023 (3 months)

Hubli, Karnataka, India

As a Backend Developer, I worked on building and maintaining robust server-side applications using PHP and the Laravel framework. My key project focused on developing a healthcare management platform — the MediCare App — designed to connect doctors and patients through a unified online system.

Project: JeeviniApp

The MediCare App streamlines patient care by managing medical records, doctor appointments, and progress tracking. It ensures seamless

communication between patients and healthcare professionals while maintaining data security and efficiency.

Technologies: PHP, Laravel, MySQL

Built the Medicare application to manage patient & doctor records.

Implemented CRUD APIs and improved database indexing.

Worked on UI/backend integration and unit testing.

Key Responsibilities & Contributions:

Designed and developed the backend architecture for the MediCare App using PHP (Laravel Framework).

Created and optimized RESTful APIs to connect the frontend and backend components.

Built and maintained MySQL database schemas to manage patient, doctor, and appointment data.

Implemented authentication, authorization, and session management for secure access control.

Integrated appointment scheduling, medical history tracking, and real-time progress updates.

Wrote clean, modular, and reusable code, adhering to MVC architecture best practices.

Performed API testing and debugging using Postman and Laravel's built-in testing tools.

Deployed and maintained the application on Apache / AWS, ensuring scalability and uptime.

Cognizant

Programmer trainee

November 2020 - September 2021 (11 months)

Chennai, Tamil Nadu, India

As a Programmer Trainee at Cognizant, I worked on developing and deploying full-stack web applications while gaining hands-on experience with both front-end and back-end technologies. I actively collaborated with teams to gather requirements, ensure data integrity, and deliver quality software solutions aligned with client needs.

Technologies: Java, SQL, Git, Agile

Worked on backend debugging and enhancement tasks across multiple modules.

Participated in Agile ceremonies: sprint planning, stand-ups, and retrospectives.

Improved existing features, fixed defects, and maintained production-quality code.

Gained exposure to enterprise workflows and client communication.

Key Responsibilities & Contributions:

Built responsive user interfaces using HTML, CSS, and JavaScript frameworks.

Designed and maintained SQL-based databases, applying backend validation for data accuracy and integrity.

Participated in team meetings to discuss progress, share technical insights, and resolve development challenges collaboratively.

Worked with cross-functional teams including QA, Business Analysts, and UI/UX designers to align technical solutions with business goals.

Performed unit testing and debugging to improve system performance and ensure quality before deployment.

Followed Agile methodologies and version control practices (Git) to streamline development workflows.

Education

KLE Technological University - Hubballi (India)

Master of Computer Applications - MCA, Computer Science · (February 2021 - September 2023)

Karnataka Science College, Dharwad

Bsc (cs), Computer Science · (January 2017 - October 2020)
